

Duralife Lockers Provided Solution for Ocean City High School

Located near the shore in Ocean City, NJ, Ocean City High School wanted to avoid all the maintenance issues associates with corrosion, when building their new school. In the 7 years since the lockers were installed, there have been no reports of locker break-ins, no doors have required replacements, there has been no noticeable scratching, and graffiti can be quickly and easily wiped off.

"Maintaining metal lockers was a nightmare. With plastic lockers, we cut our maintenance time from 3-4 weeks to just 2-3 days, and cleaning graffiti from days to minutes. I couldn't be happier," said Robert Gannon, Director of Facilities at Ocean City High School in New Jersey.
