

Eclipse Partitions (Standard) by Scranton Products

Health Product Declaration v2.1

CLASSIFICATION: 10 21 16 Solid Plastic Toilet Compartments

created via: HPDC Online Builder

PRODUCT DESCRIPTION: Eclipse Partitions are made from high-density polyethylene (HDPE), which is a highly durable recyclable material that provides a stronger foundation for bathroom partitions. This high density plastic is designed to last, while being resistant to the elements that normally result in premature wear and decomposition, including moisture and humidity, as well as scratches and graffiti. Eclipse Partitions provide a great degree of privacy, as well as strong structural integrity and enhanced aesthetics. The custom designed metal framing system and hidden hardware add to the overall sleek design. These customer designed partitions are also available in more than 30 different color options and textures, so finding a match with your bathroom's design shouldn't be too difficult. Custom designed partition hardware combined with HDPE plastic panels provides outstanding durability. This HPD covers all colors available for Eclipse Solid Plastic Partitions (Standard).

INVENTORY AND SCREENING NOTES:

This Health Product Declaration (HPD) was completed in accordance with the HPD Standard version 2.1, and discloses hazards associated with all substances present at or above 1000 parts per million (ppm) in the finished product, along with the role and percent weight. Therefore, this HPD qualifies for the LEED v4 MR credit Building Product Disclosure and Optimization: Material Ingredient Reporting (Option 1). Substances not "Identified" are those considered proprietary to suppliers, and thus are "Undisclosed" on this HPD. This HPD covers all colors available in this product line. Not every pigment substance listed will be present in every color. Please contact manufacturer for further information if necessary.

Section 2: Content in Descending Order of Quantity

This section lists contents in a product based on specific threshold(s) and reports detailed health information including hazards. This HPD uses the inventory method indicated above, which is one of three possible methods:

- Basic Inventory method with Product-level threshold.
- Nested Material Inventory method with Product-level threshold
- Nested Material Inventory method with individual Material-level thresholds

Definitions and requirements for the three inventory methods and requirements for each data field can be found in the HPD Open Standard version 2.1, available on the HPDC website at: www.hpd-collaborative.org/hpd-2-1-standard

The Health Product Declaration (HPD) Open Standard provides for the disclosure of product contents and potential associated human and environmental health hazards. Hazard associations are based on the HPD Priority Hazard Lists, the GreenScreen List Translator™, and when available, full GreenScreen® assessments. The HPD Open Standard v2.1 is not:

- a method for the assessment of exposure or risk associated with product handling or use,
- a method for assessing potential health impacts of: (i) substances used or created during the manufacturing process or (ii) substances created after the product is delivered for end use.

Information about life cycle, exposure and/or risk assessments performed on the product may be reported by the manufacturer in appropriate Notes sections, and/or, where applicable, in the Certifications section.

The HPD Open Standard was created and is supported by the Health Product Declaration Collaborative (the HPD Collaborative), a customer-led organization composed of

stakeholders throughout the building industry that is committed to the continuous improvement of building products through transparency, openness, and innovation throughout the product supply chain.

The product manufacturer and any applicable independent verifier are solely responsible for the accuracy of statements and claims made in this HPD and for compliance with the HPD standard noted.
