capturing Sacramento's history and scenic skyline. The motif was then extended into the organization's restrooms with a design made to resemble many of the area's country clubs. This includes a mix of white, silvery tiles, floor panels resembling wood planks, and Aria Partitions™ in a mahogany tone.

Aria Partitions were developed by Scranton Products to add enhanced comfort and privacy as well as elegance, warmth, and charm to virtually any enclosed or private room. In addition to removing sightlines to ensure privacy, they are also available with 17 innovative door designs, 7 panel designs, and 27 rich colors and textures.

"We've become a showroom for the Aria Partition product line," adds Murphy. "We want our members to know our restrooms serve a dual purpose to showcase Aria's durability, aesthetics, and privacy to their clients. This is the very environment we envisioned when we first began planning our new headquarters."
