

COMPLETING THE MODERN, INVITING LOOK & FEEL AT ONE OF THE NATION'S TOP RESEARCH INSTITUTIONS WITH SCRANTON PRODUCTS® ECLIPSE PARTITIONS®

One of the nation's top research institutions recently held the grand opening of a new midwestern-based business school designed to attract the region, country and world's greatest minds. This included dedicating \$60 million and 136,000-square-feet of learning space to the education of tomorrow's business leaders and innovators.

"The university wanted to modernize the business school's entire learning experience," said Dan Nenonen, a partner at GastingerWalker& in Kansas City, MO. "The campus's first LEED-certified building, literally wowed students, faculty and visitors as soon as they walked onsite. The entire building is drenched in natural light and filled with the modern amenities and open spaces that invite interaction and collaboration."

Other highlights include a café, 300-ft. elevated pedestrian bridge that connects the hall to a food truck plaza, high-tech electronics and restrooms that emphasize style, comfort and privacy. The restroom design was enhanced by the selection of Scranton Products Eclipse Partitions in a Stainless Hammered finish, which completed the look and feel of six men's and women's restrooms containing a total of 40 separate stalls.

Made of durable HDPE for commercial environments, Eclipse Partitions are available in 27 colors and textures. They combine innovative aesthetics and durable performance with minimal sightlines to deliver superior privacy and comfort over traditional restroom systems. This includes 55-inch Standard, 62-inch High and 72-inch Extra High height options. The sleek hardware on the

WERE THE PERFECT
COMPLEMENT TO
AN ULTRA-MODERN
FACILITY LOOKING TO
IMPRESS EVERYONE
WHO ENTERS.”**

Eclipse partition system is hidden, resulting in a designer look without any unsightly hinges that could interrupt the smooth elegant appearance.

In a new world view focused on health and safety, Scranton Products Eclipse Partitions are also naturally germ-resistant* and easy to clean, especially important features in today's public settings. Unlike metal partitions, which can rust and harbor germs, they offer superior resistance to impact, graffiti, corrosion, mildew, bacteria and moisture.

“We specified Eclipse Partitions based on their quality, finish options, and the privacy provided to each user,” added Nenonen. “Once installed, we were equally impressed with their height and the lack of sightlines as well as the overall construction of each panel.”

“Plus, they look great and clean so easily. The neutral stainless-steel color of the partitions seamlessly blended with the contemporary gray and white design of all six restrooms. They were the perfect complement to an ultra-modern facility looking to impress everyone who enters.”
