

BEST EGG IN WILMINGTON, DE AT THE CONCORD PLAZA, ENHANCES NEW CORPORATE HEADQUARTERS WITH SCRANTON PRODUCTS® ARIA PARTITIONS®

**BEST EGG IN
WILMINGTON, DE
LOCATED AT THE
CONCORD PLAZA**

The Buccini/Pollin Group, Inc. (BPG) recently completed the second phase of a multimillion-dollar renovation project designed to transform the former Concord Plaza in Wilmington, Delaware into an upscale multi-use environment filled with corporate offices, luxury apartments and high-end retail space. This included the grand opening of a three-story, 60,000 sq. ft. Class A office building that is now the new home of financial technology company, Best Egg.

“Best Egg signed a 20-year lease long before they moved into their new corporate headquarters,” said De’Joun Lee, BPG’s Concord project engineer. “This gave us the opportunity to build the entire facility to their specifications. An upscale corporate design that provides comfort and privacy to employees were priorities based on issues caused by the recent pandemic.”

Built from the ground up by BPGS Construction, the new headquarters features a black brick façade, thick insulated metal wall panels and a main entrance highlighted by a double height atrium that opens to a grand stair with glass railings and terrazzo tile. Other amenities include three open kitchens, acoustic wood ceilings, a patio with TVs and ping pong and foosball tables.

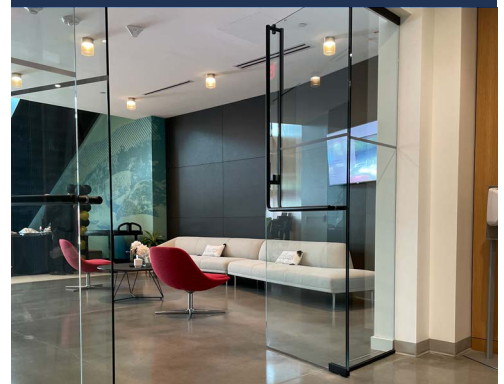

“We worked directly with Best Egg to ensure we met every design criteria,” explained Lee. “This extended from the main facility all the way to the fitness center, locker rooms and the restrooms located on all three floors.”

To accent the white tiles and flooring in each of the eight restrooms, BPG worked with Best Egg to specify Scranton Products® Aria Partitions® for a total of 23 stalls. Designed with a charcoal gray color and orange peel finish, the Aria Partitions were an easy choice according to Holly Panchak of The Union Wholesale Company in Wilmington, DE. “Full-height partitions with minimal sightlines are becoming increasingly popular with companies and educational institutions nationwide. The Aria Partitions have gone a step above due to their superior quality and extensive style choices,” said Panchak.

Made of durable HDPE for commercial environments, the Aria Partitions product line was designed by Scranton Products to enhance the comfort and privacy of virtually any restroom. Reduced sightlines and beautiful aesthetics are also achieved

**“FULL-HEIGHT PARTITIONS
WITH MINIMAL SIGHTLINES
ARE BECOMING INCREASINGLY
POPULAR WITH COMPANIES

INSTITUTIONS NATIONWIDE.”**

“WE’VE WORKED WITH SCRANTON PRODUCTS IN THE PAST AND WERE ALWAYS IMPRESSED WITH THEIR RESPONSIVENESS AND THE SUPERIOR QUALITY OF THEIR PARTITIONS...”

with continuous edge-mounted hinges, 17 innovative door designs, 7 panel designs and 27 rich colors and textures.

Another benefit is that Scranton Products Aria Partitions are naturally germ-resistant* and easy to clean. Unlike metal partitions which are subject to rust and harbor germs, they offer superior resistance to impact, graffiti, corrosion, mildew, bacteria and moisture.

“We’ve worked with Scranton Products in the past and were always impressed with their responsiveness and the superior quality of their partitions,” added Lee. “So, we knew they’d be the perfect complement to Best Egg’s showcase facility, with an office space designed from the ground up to meet the comfort and privacy needs of this leading-edge financial institution.”
